

HEAD OF IT ADMINISTRATION (M/F/D)

We offer new, varied, exciting challenges where you can contribute your considerable IT expertise as well as your experience in project management, your organisational talent and your leadership skills.

Grasp the initiative and take responsibility at our European research and development centre based in Offenbach.

Your responsibilities

Working in an open, collegial, cosmopolitan working environment, you will professionally manage a small IT team and be responsible for the following:

- Planning and steering IT projects based on ITIL best practices and constantly developing future IT strategies
- Developing, coordinating and implementing IT infrastructures in collaboration with the Honda units involved
- Active involvement in day-to-day business
- IT budget responsibility
- Collaborating with our data protection officer and attending our internal Safety and Security Committee

Your profile

- Successfully completed IT-related degree or a comparable qualification
- Several years of experience in the IT environment
- Extensive knowledge and practical experience in server virtualisation (VMware), storage administration (e.g. NetApp), Office 365, Cisco network components, IT security and data protection and the latest Windows client/server systems; Linux knowledge would be an advantage
- Experience in managing and motivating employees
- Confident communication in German and English

The successful applicant will work holistically and proactively and has a hands-on mentality. As a team player, you will have strong communication skills, the ability to keep a cool head and set priorities in the right places together with your team.

Curious?

We look forward to receiving your application.

Please send your application online – preferably in English – via honda.pme-net.de to our recruitment agent Horst Mangold at PME – Personal- und Managemententwicklung, Ingelheim.

Questions? Mr Mangold will gladly tell you more. Call +49 (0)6132 899 040, daytime or evening.

HONDA

You know Honda: they manufacture over 4.4 million cars a year and are the world's leading motorcycle manufacturer and biggest engine producer. One of the key tasks of our European research and development centre at Offenbach is to develop, test, analyse and evaluate solutions and technologies that are innovative and outstanding in terms of safety, comfort, dynamics, performance and the environment.
